🏠 House #7, Street 5A, Kolola Pushta, District 4, Kabul, Afghanistan

Profile

Computer Science graduate with strong internship experience in transmission planning and telecom operations. Skilled in microwave transmission, GSM/LTE fundamentals, PATHLOSS databases, and technical reporting. Proficient in Microsoft Access, Excel automation, procurement documentation, and telecom reporting. Experienced in administrative and financial management with proven ability to support both technical and operational projects.

Professional Experience

Administrative & Financial Officer – Kabul Shahan Construction Company

2025 – Present

- Developed and maintained accounting database using Microsoft Access.
- Managed financial records, bookkeeping documents, vouchers, and daily reports.
- Assisted with budget tracking and financial documentation.
- Drafted commercial contracts and official correspondence.
- Coordinated procurement processes including quotations, vendor management, and purchase documentation.
- Ensured transparent and cost-effective procurement in line with company procedures.
- Designed automated Excel tracking systems, reports, and operational work plans.
- Supported daily office functions through administrative and operational coordination.

Internship – Transmission Planning Department, ATOMA / MTN Afghanistan

Dec 2024 – May 2025

- Assisted in microwave transmission planning and frequency licensing under ATRA regulations.
- Performed microwave path analysis, radio/antenna selection, and performance calculations.
- Maintained PATHLOSS and TX inventory databases for 2G/3G/LTE networks.

- Handled site data documentation, node configuration, and network updates.
- Coordinated with MCIT/ATRA for license applications and renewals.
- Supported quarterly reporting and compliance documentation.
- Professionally followed up with telecom regulatory authorities (ATRA).
- **Additional Technical Knowledge gained during internship:**
    - GSM architecture fundamentals (MSC, BSC, BTS, VLR, HLR, AUC, NSS).
    - Base Station Subsystem (BSS) basics.
    - RF optimization fundamentals.
    - VSAT and microwave transmission systems.
    - Types of cables used in MW transmission.

Education

- **Bachelor of Computer Science (Software Engineering)** – RANA University, Kabul
- High School Diploma – Hewad Private High School

Technical Skills

- Microwave Transmission Fundamentals – GSM/LTE Fundamentals
- PATHLOSS & TX Databases – Microsoft Access Database Development
- Microsoft Excel Automation – Technical Reporting & Documentation
- Transmission Planning Basics – Data Analysis & Reporting
- Procurement Documentation – Contract Drafting
- Team Collaboration – Problem Solving
